Relevant Experience

Freelance Work | Programmer

2017 - Present

- Developed the Voiceify-SpotifyControl app, enabling users to control Spotify using voice commands, enhancing user convenience and accessibility.
- Designed and implemented NQ24, a comprehensive gym management app, streamlining client data management and improving operational efficiency for fitness centers.
- Created DJMacAttacks website, a personalized web platform for a client, showcasing their unique talents and services, contributing to their online presence and brand identity.

Personal Website

2022 - Present

- Constructed and continually maintain my personal website, providing a valuable platform to showcase my web development journey and projects.
- Featured a portfolio of projects highlighting my passion for creative design and technology solutions, demonstrating a commitment to producing visually appealing and functional websites and applications.
- Emphasized user-friendly experiences through responsive design, ensuring accessibility across various devices and browsers, further enhancing my web development skills.
- Gained valuable insights into web design trends, user experience principles, and SEO optimization, facilitating a well-rounded skill set as a programmer.

NQ24 - App Development

2018-2019

- Designed and developed a comprehensive gym management app from scratch, enhancing proficiency in software architecture, database management, and user interface design.
- Implemented key features such as client data management, including adding, deleting, and editing client information, demonstrating proficiency in CRUD (Create, Read, Update, Delete) operations.
- Leveraged PyQt5 for the app's graphical user interface, expanding skills in GUI development and user-friendly interaction.
- Utilized SQLite as the backend database, refining expertise in database schema design and SQL queries.
- Continuously maintained and improved the app, highlighting dedication to software maintenance and iterative development practices.

Github Profile

Feb 2018 - Present

- Leveraged GitHub as a collaborative platform to host and version control numerous coding projects, enabling seamless collaboration with colleagues and clients.
- Demonstrated proficiency in Git and GitHub workflows, ensuring efficient code management.
- Gained a deep understanding of best practices in version control, branching strategies, and issue tracking, which improved project collaboration.

Skills

Programming Languages

Java, Python, C++, C.

Web Technologies

HTML, CSS, JavaScript, React.js, Node.js, Bootstrap

Backend Technologies

.NET, C#

Design Tools

Figma, Adobe Photoshop

Version Control

Git, Github

Development Environments

Visual Studio Code, IntelliJ IDEA, Microsoft Visual Studio

Education

Faculty of Computer Science and Engineering, Skopje | 2021 - PRESENT

Engineer in Information Sciences and Computer Engineering, majoring in Computer Engineering.

Zef Lush Marku | 2017 - 2021

Mathematics (A) and Informatics.

Interests

Playing guitar, traveling, science fiction novels, music, cooking.
